

## Unloading Process

**Unloading of a 40 foot export container with a CorrPakBPS woven liner inside container:**

Position container. Right hand door is opened. Open vent port to vent liner. Unload with left-hand door closed. Bars remain in place during entire unloading process.

Direct product flow into conveying device.

Tilt container as needed to maintain product flow. Do not tilt container beyond its safe operating point.

The perfect picture of a CorrPakBPS 40 foot woven dry bulk container liner discharging its contents within 60 minutes!
